## Fully Managed Switch Port Cards

APM408C, APM408P, and APM408F

## Package Contents

The following port cards are compatible with the M4300-96X switch:

- **APM408C**. Provides eight 100M/1G/2.5G/5G/10GBASE-T ports.
- **APM408P**. Provides eight 100M/1G/2.5G/5G/10GBASE-T PoE+ ports.
- **APM408F**. Provides eight 1G/10GBASE-X SFP+ ports that support 1G and 10G transceiver modules (GBICs) or direct attach cables (DACs).

**NETGEAR**<sup>®</sup>

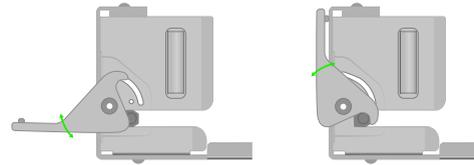

## Install a Port Card

The port cards are hot-swappable.

1. Locate an unused slot.

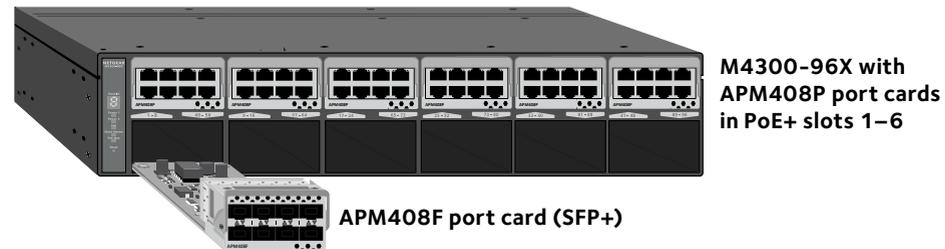

In the M4300-96X switch, slots 1–6 support PoE/PoE+. You can install an APM408P port card in any slot, but the port card can provide PoE power only when it is installed in slots 1–6.

2. Pull down the handle on the port card.

3. Insert the port card into the slot, and gently push the port card into the slot.

**CAUTION:** When inserting the port card, do not use unnecessary force. Doing so can damage the connectors on the back of the port card.

4. To secure the port card in the switch, lift the handle to the top of the port card.

For information about the port LED behavior, see the table on the other side of this document.

## Connect the Ports

For a copper port connection at 10 Gbps, use a Category 6 or better (Cat 6, Cat 6a, or Cat 7) cable. For fiber ports, use the fiber port cables and fiber modules in the following table.

NETGEAR Fiber Port Cables		NETGEAR 10G Fiber Modules	NETGEAR 1G Fiber Modules
AXC761 (1 m)	AXC7610 (10 m)	AXM761	AGM731F
AXC763 (3 m)	AXC7615 (15 m)	AXM762	AGM732F
AXC765 (5 m)	AXC7620 (20 m)	AXM764	AGM734
AXC767 (7 m)		AXM765	

## Remove a Port Card

The port card is hot-swappable.

1. Release the handle on top of the port card.
2. Gently pull the port card out of the slot.
